

Safe disposal of Hypodermic needles at the Cummington Transfer Station

Cummington's Board of Health reminds you to safely dispose of hypodermic needles.

Several needles have recently been found in various collection bins and create a hazard to residents and to Transfer Station workers.

Please, instead, use the large bin specifically for collecting hypodermic needles and other sharps, located in the Transfer Station office, free of charge.

Small one-quart collection containers for you to use at home are available at a small price if you need them.

Keep yourself and your Cummington neighbors safe!!
